

## Cleaning/Rinsing/Sanitizing Procedure

\* Clean surfaces with soap solution first. Then rinse with clean water and dry with paper towel. Finally, spray bleach solution and allow to air dry for 2 minutes before wiping with a paper towel.

**Soap Solution**

$\frac{1}{4}$  cup liquid soap  
1 gallon cool water  
Or  
1 Tablespoon soap  
1 quart of cool water  
Add the soap to the water  
**Mix soap solution  
WEEKLY!**

**Rinse Water**

Spray clean water to rinse  
and wipe off with paper  
towel.

**Bleach Solution**

$\frac{1}{4}$  cup bleach  
1 gallon of cool water  
Or  
1 Tablespoon bleach  
1 quart of cool water  
Add the household bleach  
(5.25% Sodium Hypochlorite) to the water.  
**Mix bleach solution  
DAILY!**

Use the following recipe  
for weaker bleach disin-  
fecting solution (for  
mouthed toys and eating  
utensils)

1 tablespoon bleach  
1 gallon cool water

\* Cleaning and sanitizing products should not be used in close proximity to children, and adequate ventilation should be maintained during any cleaning and sanitizing procedure to prevent children and caregivers/teachers from inhaling potentially toxic fumes.
