Your Child at 2 Years

Child's Name Child's Age How your child plays, learns, speaks, and acts offers important clues about your child's development. Developmental milestones are things most children can do by a certain age. Check the milestones your child has reached by his or her 2nd birthday. Take this with you and talk with your child's doctor at every visit about the milestones your child has reached and what to expect next. What Most Children Do at this Age: Social/Emotional Copies others, especially adults and older children Gets excited when with other children Shows more and more independence Shows defiant behavior (doing what he has been told not to) Plays mainly beside other children, but is beginning to include other children, such as in chase games Language/Communication Points to things or pictures when they are named Knows names of familiar people and body parts Says sentences with 2 to 4 words Follows simple instructions Repeats words overheard in conversation Points to things in a book Cognitive (learning, thinking, problem-solving) Finds things even when hidden under two or three covers Begins to sort shapes and colors Completes sentences and rhymes in familiar books Plays simple make-believe games Builds towers of 4 or more blocks Might use one hand more than the other ■ Follows two-step instructions such as "Pick up your shoes and put them in the closet." Names items in a picture book such as a cat, bird, or dog Movement/Physical Development

Stands on tiptoe

Kicks a ball Begins to run

Climbs onto and down from furniture without help

Walks up and down stairs holding on

Throws ball overhand

Today's Date

Makes or copies straight lines and circles

Act Early by Talking to Your

- Doesn't use 2-word phrases (for example, "drink milk")
- Doesn't know what to do with common things, like a brush, phone, fork, spoon
- Doesn't copy actions and words
- Doesn't follow simple instructions
- Doesn't walk steadily
- Loses skills she once had

Tell your child's doctor or nurse if you notice any of these signs of possible developmental delay for this age, and talk with someone in your community who is familiar with services for young children in your area, such as your state's public early intervention program. For more information, go to www.cdc.gov/concerned or call 1-800-CDC-INFO.

The American Academy of Pediatrics recommends that children be screened for general development and autism at the 24-month visit. Ask your child's doctor about your child's developmental screening.
